Community

Primary

Chef-wannabes who wants to turn their passion profitable, but don't have ideas how to price their products.

Secondary

Hobbyist chefs who wants to have a place where they can store and improve their recipes.

Problem

Most hobbyist chefs don't know how to properly make a business out of their hobby even if they want.

While it is easy to scale any production by using ratio and proportion, most of the time hobbyist chefs can't properly do the pricing for their product.

For hobbyist chefs who don't want to make a business out of their hobby, it is a hassle to keep track of all the recipes they know.

While it is easy to just search for any recipe in the web, reading recipes without knowing the drama on how the author produced the recipe is almost impossible.

Sometimes the recipe will require a specific amount of ingredient, but you only have a portion of it, trying to manually do ratio and proportion with all the other ingredients consume time and is a daunting task for those who are not mathematically gifted.

Solution

Introducing **4tions**,

An app that will let you store and share all your recipes.

Let other hobbyist chefs have their own version of your recipe.

Most importantly, an app that will take all the simple ratio and pro*4tions* for your ingredients and will give you insights on how to properly price your product so you can make a profit out of it.

User Stories

1. As a User, I should be able to sign-up and log-in on the app

2. As a User, I should be able to create and save my own recipes

3. As a User, I should be able to edit or delete my own recipes

4. As a User, I should be able to share my recipes to the public

5. As a User, I should be able to fork other users' public recipes so I can make my own version of it

6. As a User, I should be able to input the available ingredients I have, and the app will tell me how much ingredients I will need given a certain recipe

7. As a User, I should be able to know how much a recipe would cost me should I decide to make it

8. As a User, I should be able to know how much I can price my dish such that I will still gain a profit

9. As a User, I should be able to adjust how much profit margin I'd like for my dish

10. As a User, I should be able to report price of the ingredients for my recipe
